Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8,24,25, 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 1 and 3 refer to the method as "tokenless". However, these claims proceed to recite: a proposal step, a registration step, etc. Such steps would clearly require the transmission of a structured data object or textual element. Attached is a copy of the definition of token from the *Computer Dictionary 2nd Edition* in which the definition of token is described and is deemed to read on claims 1 and 3. Therefore the claim of tokenless cannot be maintained. Otherwise if there is something in this invention which makes such a feature possible which is not being recited in the claims, then this must be recited for the benefit of a full examination.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8,24,25, 28 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Base claims 1 and 3 fail to recited
